## What's New In?

Project 941 Project 941 (Hangul: 프로젝트 941; Hanja: 건설 941) was the ninth and last of a series of eight major military construction projects begun under the rule of King Taejong of Joseon. It was initiated on January 7, 1488 and ended on May 9, 1488. King Taejong's military construction projects were also collectively named as the 1481-1488 Joseon period. Purpose Taejong's purpose of the construction projects was to increase the preparedness of the palace army against the Yuan Dynasty which had attacked Joseon several times in the past but successfully repelled each of them. The original plan of the projects was to construct a series of fortresses along the Tumen River. The fortresses were intended to block the main routes of the enemy invasion from the Mongolian plains. The fortresses were also intended to provide the army with a better defensive and offensive capability. However, only the fortress at Daegu remained completed. This led to the army's easy defeat at the hand of the Mongols in the Battle of Changnyeong (July 14, 1488) and its subsequent withdrawal from the Tumen River region. Buildings Daegu Fortress The construction of the Daegu Fortress began in 1483 and finished in 1489 under supervision of the chief architect, Kim Jongpyeong. The fortress was built to provide protection against another invasion from the Mongolian plains. It had a stone wall and wooden gates. It was only 30 km away from the capital city and served as a defensive base for the palace army during the Mongol invasion in 1488. The design of the fortress strongly resembled the Chengde Fortification in Chinese tradition. Jaseong Fortress The Jaseong Fortress was built in 1481 and finished in 1484. It was also built to provide protection against the invasion from the Mongolian plains. It was smaller in scale than the Daegu Fortress and was built to protect the capital from an attack from the west. Only its gate was finished. The gate was made of wood and was only 9 km away from the capital city. The gate was opened only once, when the king visited the city in 1484, and was closed again after that. The fortress was used as an artillery base. Ch'ŏngnyeong Fortress
