We took a beer with a strong malt character to showcase some serious hops, giving you an IPA that is sure to challenge the stout drinker's palate. This beer will be available in 16oz bottles, growlers and on draft in select markets. As always the appearance is quite plain with a silky white head leaving a thin layer of lacing down the glass. The nose is mildly citrus with a note of spice, a touch of floral and a slight note of liquor. The flavor has a nice malty character and a slight spice note. The mouthfeel is medium bodied with a medium to slightly dry texture. This beer has a great balance with a good malt flavor in the background and a hop character in the forefront. Overall a very solid IPA. A: The beer is clear ruby red in color and has a good head of foam that slowly fades to a thin layer on top leaving some lacing.S: Moderate aromas of citrus hops are present on the nose.T: The malts provide a good backbone to the beer and the citrus and pine hop flavors are well balanced in the taste.M: Medium-bodied with moderate to high carbonation.O: This IPA is very well balanced and the bitterness is not too high to allow one to enjoy several a1d647c40b
