I have used the AutoCAD on an old DOS machine, I have used it on an old OS/2 desktop, and I have used it on a Windows PC using the OS/2 emulator. I remember those days, when I had to ask friends and neighbors for their old DOS machines (in 1990) so I could use AutoCAD on them. Now, if you can remember that far back, you can understand why it is so hard to find a copy of AutoCAD. Although the Free license is extremely restricted, it is still worth the try as it does offer a lot of features for free. In addition to Free, the 2020 has 3 licenses including one for a desktop app (X32), and 2 licenses for mobile apps including a Web version (X32/X64). #### What's New in the AutoCAD?

**AutoSnap** Simplify the process of designing on the go. AutoSnap supports over 200 mobile devices and operating systems, and places the entire drawing on the surface where you are drawing. (video: 4:45 min.) **Commenting** Add your comments, ideas, and proposals in a clear and organized way. Comments in CAD and you can read, search and filter them easily. (video: 1:26 min.) **Text Conversions and Spelling** Get recommendations and suggestions for your most common tasks. By providing text, tools, and suggestions, AutoCAD helps you generate more accurate and less costly drawings. (video: 1:36 min.) **International Support** Export to over 100 languages and localize your AutoCAD application. Data is stored in a centralized data warehouse, providing you with translations and customized toolbars. (video: 2:10 min.) **New Features in AutoCAD Technical Support Center (TEC)** Synchronization with Microsoft Excel: AutoCAD can now synchronize with Microsoft Excel spreadsheets. This enables you to continue working on a spreadsheet while drawing changes are applied. (video: 3:06 min.) **Drawing by Snap:** When you create a new drawing, you can also use the Snap tool to define a temporary rectangle or polyline. This draws a rectangle or polyline on the surface where the cursor is placed. Using the command line, you can also use this tool to snap to a 2D view or to a 3D model. (video: 1:57 min.) **Power. Precision. Speed:** The integration of powerful new capabilities in the Performance, Precision, and Speed tabs makes for a faster, more precise AutoCAD product. **Rapid Drafting in AutoCAD Architecture** Design without entering drawing commands. Use the drawing tools that you already know, regardless of whether they are available in your current version of AutoCAD. (video: 2:31 min.)
