First thoughts on my recent upgrade from BobCAD/CAM V22 to V23 Pro. This video is only a brief overview. First of all, I would like to say that I am happy to use the program after the update. My task is to find the best way to work in the new version. In this video, I will not talk about how it is implemented, because in this video I just wanted to share my impressions. In the end, I would like to say that all reviews of new versions can be found on the site, where I will post all the news and innovations. Hope you enjoyed this video. Sincerely, Makarov.
