ACCEPTQ: Error With R Method Parameter I'm running into an issue using R's forecast package. Basically, I'm trying to create a forecast package with my own model, instead of the tried and true 3 step HoltWinters. However, when I pass the model, the parameter p becomes a converted column of factor, even though the parameter is clearly set as numeric. If I don't specify the model, the parameter p becomes 1. Any ideas what could be causing this? Here is my model: myfunc 3e33713323
