Independent effect of c-erbB-2 amplification on prognosis in patients with advanced gastric carcinoma treated with cisplatin and fluorouracil. The purpose of this study was to evaluate the independent effects of c-erbB-2 amplification and other clinicopathologic features on overall survival (OS) and disease-free survival (DFS) in patients with advanced gastric carcinoma treated with cisplatin (CDDP) and fluorouracil (5-FU). c-erbB-2 amplification was analyzed in 172 patients with advanced gastric carcinoma by fluorescence in situ hybridization. A

similar analysis of other prognostic

factors was also performed. The influences of c-erbB-2 amplification and other prognostic factors on survival were

estimated using the multivariate Cox proportional hazards regression model. cerbB-2 amplification was correlated with an advanced T stage (p 2009-10 CAF **Champions League The CAF Champions** League is the highest level of club football in Africa, organized by the **Confederation of African Football** (CAF), since 1976. Teams The following 61 clubs were confirmed as members of the CAF Champions League 2010 competition on 11 February 2009. OFC Club América and Otago United were dissolved respectively. Club Franciscain International was suspended. Notes The top two clubs from each group plus the three best third-placed teams qualified for the knock-out stage. Draw
