First of all, the program has a basic interface, which is built with the smallest screen and features. Usage: To start DumpMedia Spotify Music Converter, double-click on the executable file. Thereafter, users should navigate to the destination folder, which will contain all their downloaded audio content. Right-click on the downloaded audio content, and then select either 'open in Finder', or 'open in Windows Explorer'. Copy the tracks which you'd like to save offline, to your hard drive, using the 'copy' option. Now, the extracted contents must be moved into the 'Downloads' folder, which is inside the 'SpotifyMusic' folder. Upon the completion of the last step, users may select the playlist and the corresponding playlist track which they want to download, using the DumpMedia Spotify Music Converter interface. DumpMedia Spotify Music Converter The audio conversion process itself is as simple as it gets, but its interface is designed with the tightest proportions, which may be an issue for some users. However, while the program's interface features a minimalistic approach, it's still functional, especially if users are looking to convert Spotify tracks to a wide variety of audio file types. As stated before, the program will allow you to download a maximum of 200 tracks per playlist, so it's advisable to avoid overwriting the same playlist or tracks, as well as trying to convert more than 20 at a single go. That being said, the actual conversion process itself is very straight-forward and powerful, as there's no time wasted on trial and error methods.
