You can download anything.Q: Porting C code to C++ on Windows I need to port some C-based code to C++, preferably on Windows (Ubuntu is also an option). The code currently doesn't compile with g++ (4.8.2). My current configuration is: g++ (4.8.2) Visual Studio 2010 Express I've tried compiling with various options: g++.exe --version g++.exe -v g++.exe --version-script=version.syms g++.exe -version All of these have the same result - it terminates with an error that complains about something with long/double being incompatible with double. I found that g++.exe -v does print C version as well as g++ version. I think I understand what it is complaining about (long and double are different types), and have a workaround for this if needed. I'm just wondering what version of g++.exe to use. Any suggestions on any other options? A: g++.exe -v is the name of the Windows program, that generates a version.syms file, that is compiled into the binary that you are using. g++.exe is the name of a C++ compiler in Windows (could also be cl.exe). You can't compile C code with a
