I would like to do the following steps Extract images from PDF using Impex Remove all spaces in the name of the files Please give me any solution I have been searching for this for 6 days now. A: I assume the PDF has a lot of images. The following works for me. You need to have the PDF installed as RAR archive. Add this line: using System.IO; // This line finds a file on the hard drive and opens it to read the image filenames private string[] GetImageNames(string pdfFile) { FileInfo fileInfo = new FileInfo(pdfFile); // Read the PDF file to a byte array byte[] pdfBytes = File.ReadAllBytes(pdfFile); // Create an archive string archive = Path.Combine(Path.GetTempPath(), Path.GetRandomFileName()); using (FileStream archiveStream = File.Create(archive)) { // Write the byte array to the RAR file using (RarArchive archive = new RarArchive(pdfBytes, CompressionMode.Create, true)) { archive.Create(); } } // Get the files in the archive string[] files = Directory.GetFiles(archive, "*.png"); // Remove the archive Directory.Delete(archive); // Return the filenames return files; } You can then iterate over the filenames and remove all spaces and hyphens like so: public static string RemoveSpaces(string filename) 3e33713323
