I really have no idea what this is about, I'm just looking for a way to setup routes. Thanks for any help! A: Apparently, you are missing the regexRoute constraint in your route routes.MapRoute(name: "DummyRoute", url: "dummy", defaults: new { controller = "Home", action = "Index" }, constraints: new { controller = "[a-zA-Z]", action = "[a-zA-Z]" }); A: It looks like you also need to specify the default values for the action and controller. routes.MapRoute(name: "DummyRoute", url: "dummy", defaults: new { controller = "Home", action = "Index", id = UrlParameter.Optional }); A: If you're talking about the MVC4 routing attributes, you can use [Route("dummy")] public ActionResult Index(string id) { } There's no need for a route name if you supply an action.
