Our experts have worked hard to showcase all of the features and pros and cons to help you make the best decision. BJ System Tools Users Say: "This software rocks! It works really well, and is fast and easy to use." - "BJ System Tools is a must have for any server admin." - "Seriously, this software was the easiest to use, even compared to those of ServerMUX." - "I have used ServerMUX, and it's excellent, but this software blows ServerMUX away. It is easy to use, easy to set up and well designed. It has an intuitive interface, and it's easy to remember the functions, so you don't have to refer to a manual or online tutorial." - "BJ System Tools does everything you need to do and works well. The interface is great and is very quick. It is perfect for any novice user." - "ServerMUX is better than any other tool I have used to administer a Unix server. I like the fact that you can drag-and-drop while you are adding and removing servers." - FILED JUN 22 2010 09e8f5149f
