This closed beta test version requires basic PS4 system functions. A more in-depth system test will be occurring in the coming days.

It's been rumored that the new Xbox One Elite Controller is delayed. But then some release information was leaked via the preorder page. We even got a look at a mockup.. And it looks more or less the same as the Xbox 360 controller with a couple of cosmetic differences

It's a long time coming, but according to IGN its definitely coming, and its only on the Wii U.

Whether accurate or not, a rumor claiming that Wii U owners are going to be able to trick or treat as well as Nintendo TVii users is exciting news. However, I don't think there's any real substance to this rumor but its just nice that something is new for the Wii U gamepad.

[Battle Fantasia] "I didn't expect to be so excited over a fantasy game." "The tales and fantastical stories, and the story of the development of the game, seem to be the utmost priority. The voice acting is amazing, making up for the lack of a simple dialogue system." "The depth of the game comes from the player's interaction with various monsters and characters." "The level design, character skills, and features added through the use of the Internet allow for a continuously surprising experience." [Webista] "A refreshingly engaging game with addictive gameplay, excellent voice-overs, and a new perspective on fantasy gaming." "Only the strong can survive and be given a crown, and only the brave can be rewarded with valor. Tarnished is also a game where players take on the role of the user. They take a gamble, and only the strongest of players will gain victory." "The impressive level of detail makes it apparent that they've spent the time to create something quite unique, and the voice-overs have a level of immersion rarely seen in a game of this genre." "One of the most impressive things about the game is how genuinely immersive it is." [Game Apple] "The charm of the game and the nicely developed setting have made this a truly refreshing game in the genre." "In a genre that is often dominated by titles that just take players straight to the combat, Tarnished stands out for its slow-burn, intricate level design and innovative combat system." "Tarnished is a game worth your time and attention. If you like fantasy RPGs, I think you'll find a nice change of pace in Tarnished's world." [Z2GameCats] "Tarnished also offers interesting gameplay in which you can form a party of up to four characters together." "All in all, this is an excellent game that really shows its worth. For fantasy role-playing fans, I think you should definitely check out this game." "Tarnished is a very enjoyable action RPG with beautiful backgrounds and a nice story. The dialogue is well done, and there is a nice story to follow." [Gamexn] "If you are looking for a unique RPG, look no further." "Tarnished is a well-designed fantasy RPG with a distinctive personality." " bff6bb2d33

[Oral sialoadenitis (sicca) and Sjögren's syndrome]. The oral mucosa of various patients was examined histologically, for the presence of Sjögren's syndrome. The incidence of an infiltration of the salivary glands was from 40 to 67%. Besides parenchymal and mucosal infiltration there was a diffuse acinar destruction. The number of mononuclear cells in the interstitium and perivascular area was higher than in the normal salivary glands. The protein composition of the saliva was used for the classification of patients with a clinically manifested Sjögren syndrome.Q: Finding a solution of this differential equation  $y'' + \frac{3}{x}y' + 8y = 0$  So is  $R(x) = (x - \frac{3}{2}) + 2\sqrt{\frac{x - \frac{3}{2}}{x - 1}}$  the solution of the equation? I thought to substitute  $u(x)$  and see if it is analytic, but it is too messy. Is there a better approach? A: Probably this is a picture-type question. So we can consider the equivalence of  $x - \frac{3}{2}$  and  $x^2 - x - \frac{3}{2}$ , and find the powers of  $x$  in the solution. If we put  $y(x) = x^u$  and write out the third derivative, we get  $x^3 u(u-1) + 2u \cdot \frac{3}{2} x^2 u + 2 \left( x^2 - \right.$
