The world of FIFA has evolved! The engine powering FIFA 22 has been rebuilt from the ground-up to build on the qualities that made FIFA a worldwide phenomenon. Get ready to experience true next-gen gameplay. FIFA 22 now features next-gen features such as Sub-meter Accuracy, Precision Dribbling, Pro Player 2.0 and Real Player Motion. Precision Dribbling allows players to control their on-ball movements with great accuracy. You can now create more moments that can only be created by players who possess the FIFA master controller. Real Player Motion recreates the natural movements of a player in a football environment, and records the movement of over 40,000 on-ball actions at speed. Get ready to take charge of the game with Pro Player 2.0. New dribbling mechanics enable you to play to your strengths by creating exactly the right moves every time. Sub-meter Accuracy allows players to execute precise passes and passes with great control. Players can now choose the direction of each touch on a pass. It's time to give free kicks a real FIFA feel. New free kick mechanics recreate the unpredictable bounces that can lead to spectacular goals. FIFA players can now run and pass freely across the pitch before the ball hits the ground. The way the ball hits the ground can change depending on the situation, so players can choose the direction of the kick and the speed at which the ball is released to create the ultimate free kick. Adaptive Player Trajectories adapt to various situations. In duels, defenders can choose to take players on at their own pace, allowing you to control the direction of the pass and angle of the pass. At the highest level, defenders can also influence the direction of the pass and use the pace of a match to their advantage. Artificial Intelligence (AI) technology takes on a new dimension. FIFA 22 for Xbox One features the most comprehensive AI in franchise history. FIFA 22 adds new Ultimate Team Champions and re-invents the way FIFA Ultimate Team functions. There will be an entirely new way to earn players and build your Ultimate Team, and the team you create will make every moment count. The Card Appreciation Tool now makes displaying players and cards easier than ever. The card app has been redesigned to make it easier to: view what cards you have added to your current card collection (SHOWING CARD COLLECTION); view what

## **Features Key:**

- **Animated Strikers :** A large number of strikers in FIFA 22 were featured in the previous generation. New animations have been added, new formations, the ability to cut before shoot have been included, and option to adjust the weight of the pass, shot and dribble.
- **New Prep Work Instinct in FIFA 2H:NEW** There is a new "prep work instinct" that can be used after a ball has entered the box. By flashing the direction of shooting, users can determine where to position their striker by what is flashing, and even freeze the defenders.
- **Goalkeepers and Defenders:** The "CHASE" attribute in the new "Finish" feature (to track and defend a loose ball) matches the movement of the attacking team closely and by adjusting the pitch speed, these features are now considerably more difficult to evade. Also added are handling options to cater for a variety of situations, such as whether to use reflexes or a slide. Of course, goalkeepers will also be able to react to new offsides rules. Defenders are now much more refined when making interceptions. Goalkeepers can also make 50+ evasive sprints.
- **Tactical Defending Set-up :** To help protect defenders, referees now have the ability to set up realistic defending set-ups in the game. This can be triggered by pressing R2 while in a defender management situation.

- 
- Improved Tackling, Balance and First Touch : Hitting opponents will send them flying with incredible force, and players are now much more able to balance themselves for the first contact with the ball if they collide. We've also improved the first touch as players don't hesitate before starting a new attack and are now better able to finish and control the ball in tight areas.
  - Copa Libertadores: Now available in free\* updates. FIFA 2H delivers 15 regions and 24 participating teams to the Copa Libertadores including 16 long-standing names. Also available in free\* updates. Soccer Championship.
  - Gaurdian Improvement: Every player is stronger, faster and better at reacting to the ball
  - Personalization : Make the game more realistic by customizing your players with tattoos, iconic hairstyles, and facial hair. The MyClub mode also extends to individual players and their personalities,
