Web services Autodesk has offered a number of services over the Internet, including 2D collaborative design 3D web design Searching Autodesk products using technology from Google Another set of services related to product information was announced in March, 2010: Autodesk Inventor 3D web based CAD service. 3D model search In October, 2007, Autodesk launched a search engine, Autodesk3D.com, which allowed users to search Autodesk's 3D data base of 3D models. In 2009, Autodesk3D.com was rebranded as Thingiverse. In February, 2013, Autodesk announced its intention to acquire the 3D printing company MakerBot. Autodesk would eventually acquire MakerBot for US\$650 million. Some consider 3D printing with Autodesk software (partially) replacing the usage of 3D printers (and other machines). Autodesk's web-based platform allows non-technical users to search for 3D models and print them. Autodesk also offers an API for 3D printing. Key products Autodesk operates under five divisions: Design, DWG, Product Design, Product Lifecycle Management (PLM) and Manufacturing. Design Autodesk Design software is used in engineering, architecture and many other disciplines. Autodesk Design is used for developing and managing 3D designs. Some other capabilities include the ability to make 2D drawings and edit dimensions. Autodesk's online service, Autodesk.com, includes Autodesk Design customers and allows web-based access to their designs, CAD drawings, and collaboration tools.
