**Kendo UI Complete ASP.NET MVC 2012.0710  
Commercial [BETTER]**

# [Download](#)

If you have a firm grasp on the HTML and JavaScript landscape, then you already know that the Web is the platform of choice for mobile, desktop and Web apps. The HTML5 is your friend, and, with Kendo UI, you get it in JavaScript as well. If you are familiar with the Kendo UI line of products, you already know that Kendo UI delivers a variety of widgets for the HTML- and JavaScript-based developer, many of which have been customized to make your development life easier. Whether you are a .NET developer or a JavaScript developer, using the Kendo UI and the Vue framework are great ways to share your application logic across multiple platforms. Maybe you are a .NET developer and have no idea what the

---

Kendo UI can do for you. Or maybe you are a JavaScript developer who needs to power your mobile, desktop, and Web applications. Take one look at the Kendo UI control grid widget for HTML5 and see if it can help your application. Maybe you need the Kendo UI Scheduler widget and want to know how it compares to others. Because Kendo UI offers a rich set of widgets, you can use the tools in your arsenal to create the mobile, desktop, or Web application you have in mind. If you are an ASP.NET developer then you've probably used Kendo UI widgets on the web with ASP.NET. If you are a JavaScript developer then you have probably seen it in .NET with Mono in Visual Studio. What if you could use the same languages to build complex mobile, desktop, and Web apps with a single toolkit? What if you could create a beautiful, productive user interface from HTML and JavaScript? What if you could put this all in a beautiful API based on the Model-View-Controller paradigm?

## **Kendo UI Complete ASP.NET MVC 2012.0710 Commercial**
