"fylsætt" are also used for the island of bornholm in general, so that the meaning of the entire term "bornholm feels" is an approximate "bornholm feels". external links municipal statistics: netborger kommunefakta, delivered from kmd aka kommunedata (municipal data) bornholm feels, home page of the bornholmsk kunst (bornholm art) foundation. category:bornholm category:gramshøj municipality category:cities and towns in the central denmark regiona strain and serum-responsive variation in the inducible component of the ornithine decarboxylase pathway in rat-liver mitochondria. mitochondrial ornithine decarboxylase was induced in liver

from rats by a variety of nutritional and hormonal stimuli, but the extent of induction was influenced by strain and also by the conditions of incubation. the induction of enzyme activity by insulin, which was the only nutritional stimulus tested, was much greater in liver from fat-fed than from normal rats. insulin also produced a similar increase in ornithine decarboxylase activity in liver mitochondria from fasted and fed rats, but when expressed as a per-microgram mitochondrial protein basis, the relative extent of stimulation was only 5 to 10% of that of insulin-induced stimulation in liver mitochondria from fed rats. the relative induction of mitochondrial

ornithine decarboxylase by insulin was also altered by the presence of 2,4-dinitrophenol, which elevates liver levels of cAMP and which is known to inhibit the induction of the activity of mitochondrial ornithine decarboxylase in intact liver. although liposomes containing a stimulatory concentration of cAMP were able to increase mitochondrial ornithine decarboxylase activity in the absence of added insulin, preincubation of intact liver in the presence of insulin abolished the effect of liposomes containing a stimulatory concentration of cAMP. the presence of 2,4-dinitrophenol during incubation of the mitochondria with insulin blocked the induction of

mitochondrial ornithine
decarboxylase activity by insulin in
both normal and fat-fed rats, and this
effect could also be observed in the
presence of insulin-receptor
complexes and adenylate cyclase.

f.2d 531 (1933) jenkins v.

metropolitan sav. & trust co., inc., et al. no. 4925. circuit court of appeals, seventh circuit. july 19, 1933. thomas p. montague and earl l. brandt, both of chicago, ill., for appellant. melvin r.

touhy, of chicago, ill., for appellee

walter h. spencer. before alschuler,

evans, and sparks, circuit judges.

evans, circuit judge (after stating the facts as above). a motion to dismiss the appeal is before us. the principal

question arises from the failure of plaintiff to file his bill of exceptions within the time prescribed by the statute, and the supporting affidavits executed by the plaintiff and his attorney, are attacked. after all, however, the attack is on the sufficiency of the affidavit filed by plaintiff, not on the facts therein stated. so we must first consider the sufficiency of that affidavit. for the plaintiff to maintain his case in equity, he must be able to show that he was damaged by the acts or omissions of the defendant. he must clearly show that the alleged misconduct was such as to prejudice his rights as a member of the bar, and that such misconduct *532 was

intentional and willful. any action by a lawyer, if not maliciously done, is a matter of professional annoyance.

here, the plaintiff alleges the negligence of the defendant. his entire case is predicated upon the same ground. in his verified complaint, the plaintiff states that the defendant caused a certified copy of the decree of the district court to be mailed to him, on the date of the decree, and that he was in wisconsin when he received said copy. in his affidavit he states as the cause for the delay in filing his bill of exceptions that he received the aforesaid copy by mail. obviously the one intent is to show that the mail did in fact reach him before the time of

the decree, and if the other is true, as affirmed by his affidavit, why was it not filed as it should have been. the time of mailing the copy is not a material fact. if it was sent at the time of the decree, plaintiff had time to file his bill of exceptions within a reasonable time. if he did not receive it until some time later, the fact that it was mailed at the time of decree would not vitiate the action of the defendant. cases cited by plaintiff are easily distinguished. in *illinois central railroad co. v. hicks*, 118 u. s. 37, 6 s. ct. 944, 30 l. ed. 69, an official of the railroad company sent out a mailgram to the track foreman, who was away on duty. the plaintiff was denied permission to send out a

telegram to the railroad office, and this was done directly over plaintiff's protest. the court held that while the mailing of the telegram might not have been approved, it did not constitute an intentional and willful injury to the plaintiff. 5ec8ef588b
