It's a great workspace where you can organize and customize your workflow in a way that works for you. You can organize the workspace into sections, which is great for when you want to work on multiple projects. You can also add custom panels. Custom panels are panels that show up at the top of the workspace and can be used to view specific image types such as RAW files, PSD files, JPEGs, Photoshop Document files or Photoshop Files. From the new Shape section in the Drawing panel, you can select and change different types of shapes such as ellipses, ovals, polygons, and triangles so that you can easily create shapes and make your work faster.
